# MEDICALLY BLONDE

*The Musical*

**Student-Faculty Show 2022**  
March 4th, 2022 | Reynolds Theater

Based on the musical *Legally Blonde* with music and lyrics by Laurence O'Keefe and Nell Benjamin and book by Heather Hach

**Book & Lyrics by:**

Emily Alway, Rhea Dash, Nikki Diaz, Lindsay Olson & Roshini Srinivasan

**Directed by:**

Amanda Del Risco & Nikki Diaz

**Creative Direction by:**

Lindsay Olson

**Produced by:**

Megan Wong & Lizzy Zhao

**Fundraising Producer:**

Emily Alway

**Musical Direction by:**

Roshini Srinivasan

**Assistant Musical Direction by:**

Julia Canick, Samantha Karle & Vishwas Rao

**Choreography by:**

Gabriella Alvarez, Trisha Dalapati, Amanda Del Risco, Nikki Diaz, Emily Goins, Alexis Harmon, Laynie Kirsch, Lindsay Olson, Kira Panzer, Jerishma Patel, Jay Rathinavelu & Alice Yu

**Costume & Makeup Design by:**

Gabriella Alvarez

**Stage Managed by:**

Vishwas Rao

**Fundraising Committee:**

Priya Alagesan, Shivani Chandrashekar, Kathy Dai

**Graphic Design by:**

Rhea Dash, Amanda Del Risco, Nikki Diaz, Megan Wong

**Writing contributions by:**  
Julia Canick, Oscar Larraza, Kira Panzer

**Music contributions by:**  
Ganesh Venkataraman, Durham, NC  
P. C. Shivan, Chennai, India

**Wardrobe & Makeup Crew:**  
Nicole Adebraddo

**Dance Captain**  
Madhura Pande

**We would also like to give a special thanks to the FABULOUS School of Medicine Faculty & Staff:**  
Deans Corsino, Drucker, Haynes, Jackson & Wigfall  
Andrea Liu & Dr. Linton Yee (and the Office of Admissions Staff)  
Sheba Hall  
Rick Melges  
Dr. Sreeja Natesan & Samiya

## *Silent Auction, Raffle, Video Sales, & T-Shirts*

The silent auction and gift card raffle will take place online — scan the QR code below with your phone camera to access the offerings! The auction, raffle, video sales, and T-shirt sales will close on **Sunday, March 6th at 12 pm.**

### **Some of our auction items include:**

- Book signed by Coach K
- Two-night Asheville weekend getaway package
- NC Symphony tickets and dinner for two
- Private group class at Orangetheory Fitness
- \$100 gift certificate to West End Wine Bar
- One-night stay at the 21c Museum Hotel
- Private Trolley Pub tour of Durham
- Dinner for two at the Carolina Inn
- Autographed Carolina Hurricanes merchandise
- Durham Bulls tickets
- Dance class packages at Fred Astaire
- Gift card for axe throwing at Urban Axes Durham

**Scan the QR code to order your video recordings of tonight's show & Medically Blonde T-shirts at the silent auction!**

**Want to make a donation?** Text 'dukesfs' to 855-202-2100

**Want to grab drinks after the show?** Head to The Glass Jug Beer Lab in Downtown Durham, where 5% of sales until 12 am tonight will be donated to Root Causes with partner Farmer Foodshare!

All proceeds from the silent auction, raffle, video sales, & T-shirt sales benefit Root Causes with partner Farmer Foodshare!

# Thank You to Our Supporters

The cast & crew of *Medically Blonde* wants to send a huge thank you to all of our sponsors, community partners, and faculty supporters!

& Root Causes**

**MEDICALLY  
blonde**

with partner

All proceeds from the show will benefit **Root Causes with partner Farmer Foodshare!** Root Causes is a nonprofit organization started by some of our very own Duke School of Medicine students! Root Causes is an interdisciplinary incubator for students to understand and build innovative social drivers of health (SDOH) interventions through service, advocacy, education, and research. They provide opportunities for undergraduate and professional learners to develop an appreciation for how these social drivers of health show up in healthcare, engage with or build community partnership programs that address them, and leave feeling empowered to become leaders in the future to address issues of SDOH. They run community-based programs such as the Fresh Produce Program that supports over 350 community members with food insecurity, the WellNest Housing Support Program that assists over 20 newly-housed community members with building a home, Healthy Harvest that runs a local community garden, and Exercise as Medicine that supports community members in reaching their exercise goals. Nonprofit Farmer Foodshare works closely with Root Causes' Fresh Produce Program to distribute fresh produce to the local community!

# Directors' Note

The Broadway musical *Legally Blonde* is notoriously challenging. It requires an almost frightening level of energy to perform vocally, physically, and emotionally — as a production team we knew we were presenting the ultimate challenge to our cast, but we hoped that at the end of the day, it would be an unforgettably FUN experience.

This cast has far exceeded our expectations, coming into rehearsals with all the energy and enthusiasm this show requires, and then some...all while studying their butts off to nail their medical school exams! (What, like it's hard?)

It is indisputable that the world has changed tremendously since the film “Legally Blonde” first premiered in 2001. Yet, Elle Woods still remains a pop culture icon 21 years later, thanks to her resilience and unapologetically positive personality - and, dare we say, great sense of style! In the original text, Elle struggles to find her way in a similarly elite academic institution, navigating law school, discovering her passions, and developing her voice, while seeking to gain the respect of her peers and professors. She weathers nearly unrelenting efforts to undermine her capabilities, reflecting the very real challenges that many individuals - especially women - face in the professional realm. As a creative team, we did not want to shy away from these uncomfortable topics: instead, we sought to give voice to our shared experiences as medical students, and to depict how change can happen when we advocate for ourselves and each other.

Elle's experience does not represent that of all women or all people, but, importantly, she is not alone on her journey. The characters you will meet throughout the production are modeled after the struggles, achievements, flaws, and desires that we and our classmates face. There are moments when these characters are carried away by competition, judgment, preconceived notions, and invulnerability; other times, we share in their excitement and pride that comes with gaining medical knowledge and skills. Ultimately, our characters learn that working together, valuing others' talents, quirks, and interests, and staying unified in the ultimate goal of patient-centered care can lead to pretty incredible things!

This show is part of a legacy over 80 years in the making, as the Student Faculty Show is one of the longest held traditions at Duke SOM. Since the 1940s, students and faculty have joined together yearly to poke fun at the unique idiosyncrasies of the Duke medical student experience, sharing stories and building community through song and dance. We are honored to uphold this tradition, and we hope you enjoy this reimagined classic with a medical twist.

Medically Yours,

*Amanda Del Risco*  
Director

of clinician leaders and scholars

# Omigod Duke Med ("Omigod You Guys")

Guess what? It's white coat day!  
How do I say, it's the best day of our lives  
Like wow, finally made it here  
Had to persevere  
'Cause you know that our future is bright  
This is where we thrive!

And now, we're in TBL2  
And we're quite a crew  
Even though it's been only a week  
So great, we all made the cut  
Are you psyched or what?  
It's just a little hard to believe  
That we're going to be MD's!

Omigod! Omigod Duke Med!  
The best MS1's that you've seen yet  
If there ever was a perfect calling, it'd be saving lives  
Omigod you guys!  
Omigod this is happening  
What a journey this all has been  
Finally we'll be trying on a perfect new white coat for  
size, omigod you guys!

Okay, here's where we come in  
Second year for the win  
Say goodbye to having free time  
Up early for notes and rounds  
Learn the cardiac sounds  
Remember all the symptoms of Lyme  
Now it's our time to shine!

Omigod! Omigod Duke Med!  
MS2 is the best year yet  
Patient care is where the best of medical school lies  
Omigod!  
Medicine is where i'm meant to be!  
Working hard to get my degree  
We're just like those doctors from Grey's only no one  
dies, omigod!

Now that we're MS3's, gone are the sleepless nights  
Research is all we need, papers are all we write  
Some of us dual degrees, staying another year  
Then there's the **MSTPs**, they tend to disappear  
Soon MS4 will come, **ERAS** and **sub-Is** too  
Caps will be thrown around, forever are we Duke  
Med blue  
Omigod! Omigod you guys!

Omigod! Guys emergency!  
Don't go through Duke South  
Hey, wait for me!  
No one should be left alone to dress and to accessorize  
Omigod you guys!

This coat needs to seal the deal  
Match my block high heels  
But it can't be quite attending style  
Can't look like i'm gunning for it  
Gotta have the best fit  
I want to make my patients smile  
So this might take a while

Omigod! Omigod you guys!  
All this week I've had butterflies  
Medicine has been my dream  
Even with all those **MMIs**  
Omigod you guys!

So help me dress for our dream come true  
Can't wear something too light blue  
Mine for the four years  
This is no time to economize  
Omigod you guys!

Omigod! Omigod you guys!  
Elle saw right through that salesgirl's lies  
I may be dreaming but I'm not stupid, lady I've got eyes

Omigod! Elle Woods! Sorry, our mistake  
Courtney, take your break!  
Just ignore her, she hasn't been well...  
Try this, latest from Gildan,  
Go on, give a spin  
I take care of my best clientele  
It's a gift from me to Elle!

Omigod! Omigod you guys!  
This one's perfect, and it's just my size!  
See dreams really do come true  
You never have to compromise!  
Omigod!

Omigod! Omigod you guys!  
This is so surreal, we just might cry  
If there ever was a perfect calling, it'd be saving lives  
'Cause we love you guys! No, I love you guys!  
Omigod! Omigod! Omigod! Omigod! You guys! Omigod!

# Duke Med Variations ("Harvard Variations")

Aaron Schultz...

I won a Nobel studying plants  
I've written 35 NIH grants  
Being the best is my birthright  
How many papers can one write?

Some say that **gunning** is my flaw  
Still doesn't give me that much pause  
Why bother with false modesty?  
Duke Med's the perfect place for me!

Pretty impressive, good to know.  
Welcome to Duke Med  
Wassup? Yo!

Sunny Pagrowell the 28th  
But you may call me the prodigy  
In my family we're all MDs  
So i apply to continue the legacy  
So here I'll learn to be the best  
And then I'll earn a top 3 **ophtho** match out west

Pretty impressive, good to know  
Welcome to Duke—

Enid Hoopes!  
I did the Peace Corps overseas, inoculating refugees  
In family clinics that I built myself from mud and trees  
I fought to help girls make the rules and we put tampons in their schools  
Creating women leaders by giving them the right tools

Pretty impressive. Good to—  
But now I'll study medicine with MSTP built right in  
Because our healthcare system is completely broken  
I'll enter neurosurgery and get more women on the scene  
And put a wrench into that male-dominated specialty

Duke Med's the perfect place for me  
Pretty impressive, good to know  
Welcome to Duke Med—

# Serious ("Serious")

Elle, since your junior year, I've seen it in your eyes  
You've carved a new frontier, brilliant projects you've devised  
Your data's tried and true, seems just like you always knew  
The physician-scientist dream was for you  
But now, there's much at stake  
I've got some grants to rake  
Deadlines approaching, now Elle

I'm not one to grandstand  
But I've got some dreams to make true  
I've got my projects all planned  
It's time to get serious, it's time to get serious with you

Since I got my MD, my path's been planned out neat  
I'd become faculty, Duke Med VP by 40  
A mansion by the beach, all of the amenities  
No friends will leave more research time for me  
Here's where my dream begins (Our dreams begin)  
But just where do you fit in? (Fit me in!)  
I'll break it down now, Elle

Hand me your lab notebook (Here it is, here it is)  
I've got data to look through (We've got data to look through)  
I know that you'll understand (Oh yes, I understand)  
It's time to get serious, time to get serious with—

Serious (Serious)  
My ideas are one in a billion  
Scoff if they don't give at least 10 million  
Wanna change patients' lives?  
Bench to bedside science thrives!  
Elle, that's why I think it's time...  
You leave the lab! (Oh yes, i'll stay for third year!)

Serious, less of a **Rosalind**, more of a **Watson**  
Serious, without a weekly hair appointment (What?!)  
So for my next of kin  
I choose Warner Huntington  
I'll pass your data to him!

Elle, my future's all planned  
OB may have room for you  
Warner said you'd understand  
It's time to get serious  
Time to get serious...

# Blood in the Bowel ("Blood in the Water")

Through all the halls of Duke Med,  
A saying is shared with glee  
By students, Deans, and doctors alike  
That **P = MD**

Ignore that – it's simplistic and it's dumb  
Only some of you will be good docs, just some  
The rest...will succumb

Today's topic is "**blood in the bowel**,"  
Kids, it's time you face,  
It's so commonplace, better be able to diagnose  
post-haste  
Blood in the bowel, **B-R-B-P-R!** May seem overkill,  
But adequate skill will make you a medicine star!

Ms. Jones, hypothetical question: what is your  
diagnosis for this patient with bloody stool?

A little baby comes in with bloody diapers  
Mom is frantic, she's never seen blood here before!  
Every time that she goes to try to wipe her  
There's lots of blood mixed in, too much to ignore!

Is it a **Meckel's diverticulum**?  
Wrong! You would have missed **intussusception**!  
She is screaming, she is crying, she's in pain  
"**Currant jelly stools**," you ask, and mom says,  
"maybe?"  
Kids got her knees practically pulled up to her brain!

If you think there's blood in the bowel, what is your  
first step?

A **scope** can be a schlep but it's not so bad with  
adequate prep!  
Yes, blood in the bowel, we'll put you to the test!

Ms. Smith, hypothetical question:  
would you pick up this patient?  
A 37-year-old man comes in to see you  
You notice first the yellow tinge that's on his skin  
Out of nowhere he's begun to have cramps that are  
no fun  
With diarrhea and fatigue to his chagrin

Of course! You think I can't diagnose a colon cancer  
with **liver mets**? I've done research on colon cancer  
for years!  
Oh, you MSTP students think you're so smart.

You chose a unifying diagnosis;  
You failed to see both **IBD** and **PSC**  
At 37 cancer shouldn't be the focus  
Patients may have as much disease as they please

So what's the point? I run the CSFC program  
I invite four rising MS2's every year.  
Better show me what you've got;  
I want to see some critical thought  
The chosen few will win a residency here...  
Do you follow me?

So I want to see what? (Strong differentials)  
Exactly! Let the games begin, collaboration's in the bin.  
Every man for himself to get the win.  
Not just blood in the bowel; you have to know it all!

Someone's had their morning pumpkin spice latte  
Can you list the **differential** for a lower GI bleed in an  
adult?  
Oh, I wanted to suggest a skincare product for the  
jaundice patient.  
But I'm asking you about the assigned reading  
Okay, who assigns a whole book for the first day of  
class?

You have guts, Ms. Woods. Ms. Kensington...  
Let us say you teach a class at Duke Med School  
A position that you're justly proud about  
But a girl on whom you call hasn't read the book at all  
Should you let it go or--No! I'd throw her out!

All right, then, you heard your classmate  
Walk on out the door  
First year's about scores, next year no more  
'Cause on the wards, the stakes aren't yours,  
It's all for the patient

So would you please withdraw  
And if you return  
Be ready to learn  
Or is it unfair?  
Oh, wait I don't care!  
That's just how I rule in life and in school  
With fear and shock and awe

Next class you'll prepare  
More than just your hair  
If you want a chance at all!

# What You Want ("What You Want")

Wait a sec – I'm exactly the type of student this program wants!  
Someone studious, someone docteryly  
Someone who will wear a **Patagonia** even though they're boxy

Girls, I have a completely brilliant plan  
What You Want, Buckley, what you want is me  
Passionate about patients, want to cure their everything  
And I can't pass on an opportun-ty  
Gotta pad my CV for Derma-tology

I'll learn about my patients, all their bumps and their moles, and macules, and papules  
Vesicles and pustules  
And yes, I'll make the most of my MS2  
Duke Med, What you want is right in front of you

What you want, it's clear  
What you want, right here  
What you want is right in front of you, front of you

**Step 1** did not go as I'd planned, but that won't make me blue - **Step 2** is my second chance to show programs what I can do  
MS3! With all my friends besides me  
There's nothing we cannot do

That's great, nice plan  
now can we think this through?  
You're going to have to score really well to get into a medicine residency;  
what makes you think you can do this?

LUNGS, I'm doing this for LUNGS  
Cuz Pulm-Crits where I thrive  
And with lungs on my mind, I can't lose  
And programs can't refuse, a student so enthused  
Unless I fail step 2...

That's not true!  
But, what you want, buddy, is no easy thing  
If you want to score high you'll be studying till Spring, yeah its true  
Gotta get your Step 2 score closer to 244  
So no more **Shooters** for you

Let's overwhelm with resources until you explode  
Subscribe to **Med Ed, UWorld, Amboss**,  
Do you have a discount code? Uh, no.  
Dang, well hope you got the cash  
To pay for all of the things you need to pass

What you want, yes I know  
What you want, even so  
What you want is right in front of you, front of you  
What you want, start studying!  
What you want, no really start...  
What you want is right in front of you, front of you

Hey everybody, it's Friday at Shooters, you know what that means-  
GRAD NIGHT!  
Not for you, time to study, go!  
This week's theme - Bollywood!

192, not passing yet. Try again. Go!  
222, not quite there yet, go!

Lungs, I'm doing this for lungs  
Cuz Pulm-Crits where I thrive  
Take a breath, soon I know I'll be free  
I feel so damn ready for **USMLE**  
Will you read it for me? 273!

So gentlemen, the CSFC program grants interviews to...Warner Huntington, and Enid Hoopes,  
And now, Ms. Elle Woods  
Who...has decided to send in a headshot.  
Well, she is very impressive, graduated Summa Cum Laude - with a major (she created) in Fashion Merchandising  
She also has a recommendation from Coach K!!  
We should admit her, for reasons of, um non-traditionalism

Oh gentlemen, please, get a hold of yourselves  
Oh, look at that! Oh, what a shame!  
She didn't bother sending in a personal statement!  
How's this for a personal statement?  
What you want! Goodness me!  
What you want! Security!  
What you want is right in -who are you?

*(continued on next page)*

# What You Want ("What You Want")

I'm what you want, doctor; I'm the girl for you!  
And to prove it's true I brought all my classmates too  
Hey there! What's new?  
This is what Elle Woods inspires  
Everyone admires her, and you all will too!

This is not a personal statement!  
No! We've written too many of those essays before  
So we're all here in Duke Med Gear  
Making clear you can't ignore  
That Elle Woods should join the chosen few  
Duke Med, what you want is right in front of

Go Blue Devils!!!

Now see here, Ms. Woods!  
You can't just barge in here with singing and dancing  
and gyrating movement  
This is a very flashy presentation, but I still don't see  
one reason to advance you to the next round

What about love? 'Cause medicine's what I love.  
And my love will only grow  
This career is something unique  
To help the sick and weak, to heal with what we  
know

Can't say no to a student in love  
Don't laugh when I say love  
Don't think that I'm naive  
Because even a person who's smart  
Can listen to their heart, can listen and believe  
So believe in what love can achieve

Do you believe? I do!  
Do you believe? Me too!

Yes, we believe in love!  
How 'bout you?  
You're onto the next round  
What you want  
What you want  
What you want is right in front of you, front of you  
What you want!  
What you want!

# Mnemonics ("Positive")

Study hard and read the text, **Dr. Robbins** says it best,  
**Sketchy Micro's** totally sketch,  
and **Boards and Beyond** too

Don't you want to learn this stuff, without all that  
stupid fluff, open your textbook to page one,  
Then you'll be smart like me!

NO! We've got mnemonics, like candy for my brain  
We've got mnemonics, just memorize without the pain  
We can learn medicine, with acronyms from  
All cause we've got our mnemonics.

Guys c'mon, we are learning from the greats,  
future patients' lives at stake, don't you want to boldly  
state the answer when you're **pimped**?

Uh, yes! Using imagery and rhyme,  
I get the answer every time.  
With a great strategy like mine, you can get that **70!**

With our mnemonics, they're easy to digest  
With mnemonics we know we'll always pass the test

With some creativity, we increase brain activity  
All cuz we've got our mnemonics, our mnemonics, our  
mnemonics our mnemon-

These are all our mnemonics:

**Sad Pucker** and **Vindicate**, **I get smashed**,  
**hot T-bone stEAKs**,

Can't see, can't pee, can't climb a tree, can't hear a bee  
**ABCs**, Tender Loving Care for NANCY

**SIG E CAPS**, **Wet, Wacky Wobbly**,

**So long to pinky here comes the thumb**,

I gotta admit this is really fun!

have got to say I think you might be right  
Learning medicine cannot be done in black & white  
I have to step up my game, dust the cobwebs off my  
brain, hand me my **First Aid!**

They've got mnemonics, highlighted in bright red  
They've got mnemonics, so great to learn with my best  
friends

We all learn in our own way, lectures, **Anki**, & First Aid  
Tryna get our knowledge to stick,  
With my mnemonics!

# Stain On My White Coat ("Chip On My Shoulder")

Love - Excuse me?  
I put my faith in love  
My love of medicine

It's led to a world full of shame  
Warner beat me at this game  
I'm SO not feeling fab  
Cause in lab I could be publishing

But now I've missed my shot  
And Warner took my spot  
Funny he was my friend and my rock  
I think I don't fit in, I know my classmates talk

Wait, go back!  
You stayed at Duke just for this P.I.  
Dream doesn't care if you fall or you fly  
There are more supportive mentors in this school.

I see you've made a bit of a mess  
Even with all that, you can impress  
There are more important things than how you dress

I wanted to do everything right  
Showed up first day early and bright  
But the gel pen in my pocket had other plans

I still made it through all of first year  
Started MS2 with nothing to fear  
Show it to kids to keep them calmed  
during scans  
It looks like a cat, but what does that stain have to do  
with anything?

There's a stain on my white coat  
And it makes a great anecdote  
Knowing life isn't perfect, so I wear it with pride  
Doing this for my mama, so I brush off all the drama  
Yeah, there's a stain on my white coat  
And now you've got one on your side

Okay I get it, but I'm getting this dry cleaned  
tomorrow... although, your mom must be really  
proud of you.

My mom raised me all on her own  
Working two jobs wore her to the bone  
Now she's having trouble taking all her meds

So I want to help people like her  
Helping patients feel like they are heard  
Preventive care should not depend on what you make!

No! That's the stain on my white coat  
Time to let the status quo go  
With the chance I've been given  
I'm gonna do Family Med  
Though I can't change my mom's past  
I might just change the forecast  
Be proud o'the stain on your white coat  
Student doc Woods comma Elle

I just need to get into CSFC to prove that I'm serious!  
But I'm so overwhelmed with coursework and  
extracurriculars, and I know my interview isn't till the  
end of the year but I'm feeling so lost already.

Ya know, I used to feel the same way  
Then I started chipping away,  
A case a day on top of all my first year work

Can you live without this? Can you live without that?  
I don't know what this is...they're for hair!  
Wear a hat!  
Spend more time improving what's inside your head!  
Out, out, cancel your class pass, just go to Wilson, don't  
waste your time  
Out, out, life isn't pretty, gotta get gritty and you'll find  
There's a stain on your white coat  
And it's no reason to mope

Knowing life isn't perfect, so we wear it with pride  
There's just no way around it, you gotta plow through  
til you've...FOUND IT!

Let's give auscultation a try. . .  
Tis a gift to be simple, tis a gift to be free

I know it is less than i-deal  
But if Thursday you want a hot meal  
I'm making dinner with my mom if you want to come

It isn't much but we always have fun  
We can do Anki till our cards are done  
Bring Bruiser too, and we'll feed him extra crumbs

Gloria, in excelsis Deo!  
(continued on next page)

# Stain On My White Coat ("Chip On My Shoulder")

I know you got "I" on the **DiSC**  
Resident social butterfly of TSCHE  
Now and then might have to find your inner D or C

Just look around, you've got lots of friends who  
back you up and believe in you!  
Plus by your side from here on out, you've got me

Yes! I've been doubting myself, been stuck in my  
shell, when I'm doing fine!  
Let's take things as they come  
It's just MS1, there's plenty of time!  
With a stain on my white coat  
I'll balance this tightrope  
Path, micro, immuno, still gonna solve the big case!  
Let's go home and get to this  
And still make time for Christmas!  
Yeah, there's a stain on my white coat  
And I will leave it in place!

Member of TBL2, show 'em that you're no fool  
Member of TBL2, go back to school with that stain  
still on your white coat!

...with an elevated LDH and pulmonary infiltrates, the  
patient clearly has pneumocystis pneumonia. Let's go  
with...dapsonsone to treat.

Now you're thinking like a doctor! Yes, Miss Woods.

I agree with Warner on the diagnosis  
But did the team test for adequate glucose-6-phosphate  
dehydrogenase activity before treating?

No. Why do you ask?

Well, if he has underlying G6PD deficiency and is treated  
with dapsonsone, she could have a severe  
**oxidant-induced hemolytic reaction**. Has she ever  
taken antibiotics before?

He reports jaundice after a UTI once.

That probably was from **Bactrim**, meaning he has  
G6PD deficiency. I, personally, prefer my patients' red  
blood cells to remain intact, so I think we should treat  
with IV **pentamidine**...after checking his **creatinine**, of  
course.

Miss Woods, you just solved the case!

Omigod, wait, hold on, Elle just solved the case!  
Omigod, Elle got all up in Warner's face  
Omigod, Elle's in the CSFC race! Yes! Omigod!

Miss Woods, excellent work today. The CSFC team looks  
forward to reviewing your performance. Do you have a  
resume? We forgot to ask at your interview.

I am one step ahead of you. Here you go!  
Dear God, it's scented. Three months ago, I would have  
recycled this. Make sure to put it on file.

She's still got that stain on her white coat  
Guess she's taken some notes  
From an older and wiser  
Guy who's coat's stained with gel  
She was something to see there  
I'm just happy I could be there  
First big case and she aced it  
She's so close she can taste it  
She got a stain on her white coat  
Guess you never can tell  
With student doc Woods comma Elle!

Elle Woods, Woods comma Elle  
Stain on her white coat

No you never can tell  
Elle Woods, Woods comma Elle  
With student doc Woods comma Elle!

# So Much Better ("So Much Better")

All of this hard work paid  
And the friends I've made  
Hope it's all been worth it

Missed out on spending time,  
To memorize cell lines  
Hope it's all been worth it

But to my future patients I can say,  
I worked so hard every day  
No matter what that sheet says, I did it my own way

Hey! Is that my name up on that list?  
Does someone know that I exist?  
Is this a mistake? Am I even awake?  
Pinch me now to make sure

Ow! Yes, that's my name in black and white  
Maybe I'm doing something right  
Wow! I feel so much better than before

Warner, using my dataset, you'll go far I bet  
How's that working for you?  
How's it feel to still need my help,  
Figure it out yourself, when i'm working with you  
What? Working with who?

My foundation's sturdy and I'm ready to learn how to  
apply it; )For the summer now, we'll have to say  
goodbye - I'm gonna cry

Seeing the knowledge we have gained  
And all the skills we have obtained  
Differentials considered  
I can **palpate the liver**  
My thesis in **Nature**

Growing our medical foundation,  
Who knew it would be this much fun,  
Because now we are so much better, we grow, much  
better  
It's so so so so so much better  
and we feel so much better than before  
Yes, they're so much better than before

Quickly is what you prefer  
I talk to patients forever  
Learning all their puppies' names  
games of Uno we will play

That's what matters most to them  
To all my patients, I'm their friend  
Have plenty time to diagnose  
And still write a killer note!

The knowledge we have gained  
And all the skills we have obtained  
Now my suturing's great,  
Can detect a heart rate,  
Interpret a blood gas,

Growing our medical foundation,  
Who knew it would be this much fun,  
We feel so much better

I'll be there on Monday, 5 o'clock  
And wake up my patients just to talk

No, no, it can wait, rounds start right at 8  
Gotta write out my **SOAP**

Oh, oh, seeing the knowledge we have gained  
And all the skills we have obtained  
And you'll go, oh, much better, and oh, much better,  
and soon all y'all gotta know much better

We are so much better (we feel so much better)  
We are so much better (we feel so much better)  
We are so much better (we feel so much better)  
Than before!

# Whipped Into Shape ("Whipped Into Shape")

Hi, I'm Dr. Saumil Chudgar and these are the 3rd  
year CSF instructors

Welcome back to the Duke Med Year Two

## Clinical Skills Intensive

And our daily commitment to making you the best  
clinicians you can be

So grab your Littmann Cardio 4 for the wards  
'Cause if you wanna be equipped, you gotta get  
whipped. Take it away, Brooke!

Are you confused by lab work?  
Wonder what's a **B-U-N**? Don't say bun!  
Wonder why the sodium's only 110? **ADH!**

You'll learn all about the coagulation cascade!  
Don't say transaminitis, LFTs aren't inflamed

I want you whipped into shape  
When I say SOAP say "How soon?"  
If you're efficient **post-call**  
You'll be home by noon  
Better keep up for your **shelf**  
You've gotta to whip it, whip it, give 'em hell

What's the rhythm, what's the rate?  
We need you whipped into shape!

Uhh...I think it looks fine?  
Actually it's a massive **STEMI**

March it out!  
Whipped into shape

I hate you, Brooke  
And I love you for it!

Now when you go outpatient  
you'll be just as busy too  
Intake, rooming, vitals, don't forget about the flu!  
Gotta eat your meals between visits  
cause you're running short on time  
And end the day exhausted though you started at 9

We'll have you whipped into shape  
Especially for Family Med  
The schedule says one problem,  
but the patient lists ten

It's a complicated case  
You've got to chart, chart, chart, no time to waste.

How did my notes get erased?!  
We'll get you whipped into shape!  
Who's next?

Speaking of internal medicine...let's practice the  
cardiopulmonary exam!! Here we go!  
**Aortic, pulmonic, tricuspid, mitral, and Erb's point**  
MS2s, do you hear the murmur?  
Now for the lungs! Left, right! Left, right!

We need you whipped into shape  
Not only brains but brawn too  
Chasing attendings down halls  
Retracting 'til you're blue

You'll stand for hours on rounds  
No time to take a break in the **HAFS** lounge  
Hope your resting heart rate's great  
We'll have you whipped into shape

Speaking of resting heart rate, it's time to see if you  
REALLY can keep up with team. What, you guys  
thought we were done?

We've got you whipped into shape  
This is it-- your time to shine!  
Go out and use what you've learned  
Trust me , you'll be fine!

No longer stuck here in TSCHE  
Medical instincts you will establish  
Now's time to learn the landscape  
'Cause now you're whipped into shape

Can anybody point us in the direction of breast  
imaging?

Find the gift shop, up the stairs,  
Cross the bridge, up to two!  
That's right, you found it!  
Whip it, whip it, whip it,  
You're whipped into shape!

**I feel  
comfortable  
using  
medical jargon  
in everyday life.**

**Duke Surgery**

Duke University School of Medicine

# Stick it to the Man ("Take it like a Man")

What is this place?  
It's called a Delivery Suite.  
It's- It's beautiful.

First a deep breath, take it all in  
Feel all those baby lights warming your skin

Smell how she's ready to push now. Dee, we can tell.

Love! Excuse me?  
Love, the baby's name. Oh. Creative.

I know you're scared, nevertheless  
Don't think of the people you want to impress.  
Swallow your pride for me

Just nod yes and prepare  
Cause something's in the air

I think it's "Love". Exactly!  
Here I'll become what I'm supposed to be  
And Surgery's still in my plan.  
These are the patients I want to treat.  
Here's my dream, I'll take it  
So give OB a chance.

Did I like that? Maybe I did.  
Can't believe I just delivered a kid.  
Why did I never consider this?  
Wait, what's that smell? **Meconium**

That I don't like. That's kinda neat!  
Why do **tenaculums** need to have teeth?

Well I've come this far, and this just might beat  
A **craniotomy** - it can't be!

Will I become what I'm supposed to be?  
Or what everyone else says I am?  
OB/Gyn or Neurosurgery?  
Here's my chance to change it  
And stick it to the man

God, I love finding the cervix. Okay, that is strange.  
Is it contractions or Braxton-Hicks?  
No med students!  
Watch as the station grows, the effacement shows  
Oh no! I feel toes!

Glad I still love scrubbing in - watch your hand  
They walk in as two, and walk out a fam  
Don't touch my stand!  
And once the surgery is complete  
Come out so that I can see

*Whoa. You look like a surgeon.*  
*Yeah. And it's so me.*

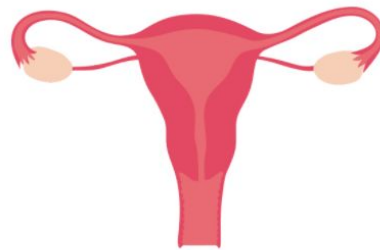

That's the best part. Specialty's new.  
But it still reflects what's already in you.  
Couldn't change that if I wanted to, and I do not.

Thank you - no, Thank you  
You don't have to pick a field that's male-led  
Clear all those stereotypes from your head

Oh, it's still up to you, don't get me wrong.  
Choose what you want, it's what you want

Here we'll become what we're supposed to be  
Surgery's still in our plan.  
Think of the docs we want most to be.  
Even though I didn't think of OB.  
But when she's standing so close to me  
I think I like her plan

It's my chance to change it  
Our chance to change it!  
So give OB a chance!

# Whipped Into Shape - Reprise

Let's see how whipped into shape you *really* are-- our first case starts right now!

Meet our brand new patient, Greer  
She came here in disrepair  
Been to experts far and near  
But no one could help her there

She's got a bit of everything, neurologic pain galore  
Belly pain, **diplopia**,  
and way more psych symptoms than before

If it were up to me, I'd send her packing out the door  
You cannot fix **conversion disorder**

So...?  
*Just wait...there's more*

Her husband, Jeff's, my longtime friend  
Met him back in undergrad  
He's a chemist for 3M  
We meet each year in Trinidad

Every day and night he's spent  
By Greer's side while she declines  
Doling out every expense  
He reached out for fear that she would die

*Die?! Are you sure you want a bunch of second years on this case?*

If you're so whipped into shape  
Then you have nothing to fear  
Go and take a history  
I'll be waiting here

Best diagnose her somehow  
Your precious Anki cannot help you now  
Don't forget to close the drape  
I hope you're whipped into shape!

# And Retract ("Bend and Snap")

Look at my scrubs  
Look at my cap (scrub cap)  
A surgeon right on track  
I'll chase my goals, I'll be the best  
Wanna watch me? Be my guest!

In the OR everyday, on the job, can't hesitate  
Wake up early, stay here late  
Watch me while I stand in place  
And retract! Look at the view they're getting  
And Retract! And when you think you're sweating  
Pull it up and help them cut  
Arms are sore, can't take no more...And retract!

Oh that's easy for you to say - and you!  
Boy, if you wanna join the team, anticipate their needs.  
The more you talk about the task,  
the less that they will ask

Please! Surgery is too intense  
Can't even eat, can't see my friends  
My team's going to round again, I'm waiting for this case to end - oh please this case will NEVER end

Just stand, retract - Ow! Look how good you're doing  
And retract, and when you feel like resting  
Don't let go, and don't break scrub!  
Hold on tight, with all your might, stand here and...

It's not the time to look like a stud  
Just prepare to be splashed with blood!  
Excuse you me could you give me tips?  
When I retract it always slips! Sure!

Can't give up or throw in the towel  
Smell that? I think we **perfed the bowel!**

Come on, Kiki, get the staple gun! What is this slime?  
Get the omentum out of my way, okay, and retract!

Dr. Army-Navy!

*(continued on next page)*

# And Retract ("Bend and Snap")

Hey wait a second when I entered  
The OR wasn't perfect  
Got the Mayo, lights are down low  
Can't mess with this expert workflow

Will you raise the bed up high? YES!  
And get the tools I like? YES!  
And cut the sutures right? YES!  
And I will tell you why - WHY?

I'm just rockin' the OR all day  
Gotta set this up the right way  
Finessin' tools is how I play  
I'll let you close then walk away

But just before I walk away

You stand, retract!  
Look at the view I'm getting!  
And retract!  
And when you feel like quitting

Don't let go, and don't break scrub!  
Hold on tight, with all your might  
Let's go Doc, let's go Doc  
Hold on tight, with all your might  
Let's go Doc, let's go Doc  
Hold on tight, with all your might

Just stand, retract  
And retract!

Paulette, get us a better view here!  
Check out this view, Kyle!  
And retract...  
Oh crap!

# There, Right There! ("There, Right There!")

Look at that tender, painful skin  
Look at the great fatigue she's in  
Look at the ascending pattern it's in  
Oh please, look it's **Guillain-Barre**

I'm not about to single out  
Only neuro without a doubt  
What about potential GI routes?  
Guillain-Barre we cannot say

She has nausea and vomiting here  
Though the symptoms aren't quite clear  
She has blood in her rectal smear  
GI might totally be the way

But look at her weak and tired limbs  
Really, it's looking kinda grim  
But we only have labs back prelim  
Look, we have to pick! What do we pick?  
Is it GI, or neurologic?

GI or neurologic? It's hard to separate  
Is it GI or neurologic? Well, she's in quite a state

You see, this might affect which treatment  
We decide to give to her  
We need to know before giving her IVs or drains galore

What about infection?  
It could be festering for weeks  
Could there be any connection?  
With the rash upon her cheeks?

Does she have a parrot? Been eating deli meat?  
Maybe allergies to wheat or numbness on her feet

Is it dermatitis or an infection, or -  
There! Right there!  
We've heard she's been sulking 'bout her room  
Well, is it relevant to assume  
A strange demeanor and some gloom  
Would mean that psych could be the way?

That is the question here at stake  
I think her symptoms could be fake  
That's an assumption we all make

# There, Right There! ("There, Right There!")

It's dermatologically - No, psychologically  
False, neurologically - But radiologically,  
No, it can't be so - Definitely, no no no no no  
Dang it!

What could this be then?  
Lab findings are so vague  
She's got every single symptom  
It might just be the plague

You see, this might affect which treatment  
We decide to give to her  
We need to know before  
Giving her IVs or drains galore

Let's take a stress test, her rhythm is misplaced  
She's **tachycardic** at rest -  
Wow, we cannot crack this case!

But look at the **ANA**  
And **ESR's** high too  
**CRP's** through the roof (resident 1)  
But yours are probably like that too

What ever could this be then?  
What could thi-is be then?  
What could this be-

Med students, you're up!  
Give a chance at working this up  
This diagnosis is a toss-up  
Let's see if you paid attention

So, Mr. Huntington  
What would be your diagnosis if she only had  
A heliotrope rash? Dermatomyositis

And diarrhea? IBS

And if she had chorea? Huntington's

But guess what? She has all of these symptoms.  
But..but...but how?  
Welcome to the real world of medicine

What? How could this be?!

Everyone, listen up here!  
Her symptoms are neuro and GI  
Derm and psych fit too  
You can't just always go by  
What they will test on Step 2

Talking to the patient  
Can sometimes makes things clear  
Maybe after lots of questions, answers may appear  
So lend a ear, do not fear  
Repulsive things you might just hear

Wonderful

So if I may, I might just say

It's neuro! (What could it be then?)  
It's GI! (What could it be then?)  
It's psych! (What could it be then, what say!)  
It could always be lupus

# Medically Blonde ("Legally Blonde")

Take back the books and pack up the clothes  
Clear out the room and drop off the key  
Leave with what's left of my dignity  
Get in the car, and just go

Chalk it all up to experience  
They said I'd fail but I disagreed  
Who could say then where my path would lead?  
Well, now I know

Back to the sun, back to the shore  
Back to what I was before  
No patients to heal  
My world now feels so very small

What will I do when I move on  
I hope you're still proud of me, mom  
We'll have to see, for now I'll be  
Medically blonde

Thanks for your help and for all you've done  
Thank you for treating me decently

What's wrong?

Maybe someday you can visit me  
Give me a call, say hello  
Wait, where are you going?

Sorry, I'm letting down everyone  
What brought on this?  
You gave your best with a hopeless case  
That's ludicrous  
You are the best thing about this place  
Elle, you should know-

*Mr. Wyndham hit on me*

*He what?*

*He hit on me, I told Callahan, and he didn't believe me*

*He's wrong, we'll fix this, we'll fight*

*He threatened to pull me off the case; there's no reason  
for me to stay*

What about love?

I never mentioned love  
The timing's bad, I know  
But perhaps if I'd made it more clear  
That you belong right here  
You wouldn't have to go  
'Cause you know that I'm so much in love

Back to the sun, back to the shore  
Back to what I was before

Please, will you open the door?

Lie on the beach, dream within reach  
Don't stray beyond

We both know you're worth so much more

Some girls fight hard  
Some face the trial  
Some girls were just meant to smile

If you can hear, can I just say how much I want you to  
stay?

It's not up to me  
Just let me be  
Medically blonde

I need you to stay

It's not up to me  
Just let me be  
Medically blonde

# Medically Blonde Remix ("Legally Blonde Remix")

Maybe Warner saw a blonde who was using her  
looks to get ahead,  
But I see a woman who doesn't have to.

I used to pray for the day you'd leave  
Swore up and down you would not belong

But when I'm wrong, then I say I'm wrong  
And I was wrong about you

So listen up! I see no end to what you'll achieve  
That's only if you don't turn and run

You proved it to me,  
Now show everyone what you can do  
And you look great in Duke Blue!  
Get back in the game, back on the case  
Take a good look at my face  
'm not a fool, and as a rule  
I do not bond (never known her to bond)

But I see a star, you're my new muse  
You've got the best freakin' shoes! And you lit a fuse  
So go show them who's Medically Blonde!

*Sorry Vivienne, but I'm never wearing that again.  
Elle, Honey, you're in the supply closet!  
I know! I said I'm never wearing that again...I'm wearing  
THIS!*

Back in the game, I won't be exiled  
I'm going back in my style  
'Cause it's a fact, when you're attacked  
You've got to respond

Hand me my dog, hand me my scope  
And I've got my white coat!

Cause nobody screws  
Somebody who's  
Medically Blonde

Get on your feet  
Cause she's medically blonde  
Kicked to the street  
Cause she's medically blonde  
There's no retreat cause you're  
Medically Blonde

Don't be afraid to be  
Medically Blonde  
Join the parade cause she's

Honey look! She's leading a parade!  
Mom and Dad! Get a picture!

Just one more please cause she's Medically Blonde  
Everyone say cheese! No, say Krzyzewski!  
Medically Blonde!

Cause she's medically blonde...

Omigod Elle!  
Omigod, my TBL2 friends!  
It's your big day! We know you'll crack the case!  
We came to see our team member be  
Medically Blonde

Jump on your feet  
Cause she's medically blonde  
You've got a right to be medically blonde  
You've gotta fight to be  
Medically Blonde

Back in the game  
Back in the fray  
Back up y'all, outta her way!

We'll get Callahan fired.  
And someone new hired

If we're gonna succeed  
You gotta to be...  
Medically Blonde!

And she's medically blonde, oh yeah  
And she's medically blonde, oh yeah  
And she's medically blonde, oh yeah  
Medically Blonde, oh yeah!

# Find My Way ("Find My Way")

Though I dreamed of this day long ago  
Now my answer is thank you, but no  
Look, I've barely begun, I'm hardly through

I was living in ignorant bliss  
Til I learned I could be more than this  
And you know, in a way I owe it all to you

I thought losing the lab was a blow I could never  
withstand  
Look how far I have come without anyone holding  
my hand

I had to find my way  
The day you broke my dreams  
You handed me the chance  
To know what passion means

You helped me find my way  
There's still so much to learn  
So many dreams to earn  
But even if I crash and burn ten times a day

I think I'm here to stay  
I'm gonna find my way

*William Shakespeare wrote  
"To thine own self be true, and it must follow as the  
night the day,  
thought cans't not then be false to any man."*

*I think this wise statement best applies to a woman--a  
blonde woman.*

*Over the past four years, she taught me and showed us  
all that being true to yourself never goes out of style.*

*Ladies and gentlemen, Duke's newest Derm intern:  
Elle Woods!  
Ladies and gentlemen of the class of...*

Here's the part where she gives her big speech  
We're so proud, but Elle's not one to preach  
So she said we can play "Where are they now?"  
Here we go!!!

I've decided on OBGYN  
We'll matched together, too  
Warner quit, said he makes more consulting anyhow

Callahan's unsurprisingly sacked from his faculty post,  
And his buddy Wyndham was left with nothing post  
messy divorce,

And me, I think I'll find my way  
And hey! I'm dating Kyle!  
And we all matched first choice  
And here at Duke we'll stay

And I was brought to justice,  
And I ended up in jail

And now I have a little one  
Just like I'd always dreamed!  
And I have Elle to thank...

I thank you one and all  
The ones who thought I'd fall  
Who taught me how to fail  
Who helped me to prevail  
I'm standing here today  
To help me find my way!

And now, the moment we've all worked so hard for...  
Emmett Forrest, please make the happiest woman I  
know  
Omi-omi-omigod!  
Omi-omi-omi-omi-omigod!  
Omigod, omigod you guys!  
Granted, not a complete surprise  
But if there ever was a perfect calling  
It'd be saving lives!

And now I've matched Pulm-Crit!  
I found my way to lungs!  
I finally found my prize

If there ever was a perfect calling  
It'd be saving lives,

Cause we love you guys!  
No we love you guys!

Omigod! Omigod!  
Omigod, you guys!  
OMIGOD!

# Glossary (1 of 2)

so that you, too, can feel comfortable using medical jargon in everyday life

**ADH**: antidiuretic hormone, often a cause of low sodium

**ANA**: a test of autoimmune disease

**Anki**: a popular online flashcard program used by medical students

**Aortic, pulmonic, tricuspid, mitral, and Erb's point**: locations and sounds to check when listening to the heart

**Bactrim**: a common antibiotic

**Blood in the bowel**: symptoms of bleeding somewhere in the GI tract

**Boards and Beyond**: a popular test-prep resource

**BRBPR**: abbreviation for bright red blood per rectum

**BUN**: blood urea nitrogen

**Clinical Skills Intensive**: the one-month "bootcamp" prior to beginning clinical rotations in MS2 at Duke

**Conversion disorder**: neurologic symptoms that can't be explained by medical evaluation, a diagnosis of exclusion

**Craniotomy**: operations involving a hole in the skull

**Creatinine**: a measure of kidney function

**Currant jelly stool**: a hallmark symptom of intussusception, translucent red blood in the stool

**Differential**: possible disorders that could be behind a set of symptoms

**Diplopia**: double vision

**DiSC**: a leadership style assessment with categories of Dominance, Influence, Steadiness, and Conscientiousness

**Dr. Robbins**: author of a prominent pathology textbook

**ERAS**: Electronic Residency Application Service, the residency application portal

**ESR, CRP**: nonspecific lab tests for inflammation

**First Aid**: a well-known test-prep resource, particularly for Step 1

**Guillain-Barre**: a neurological condition with ascending numbness in the limbs

**Gunning**: highly competitive attitude towards school, often at the expense of others

**HAFS**: Hospital Addition for Surgery

**IBD**: inflammatory bowel disease

**Intussusception**: when one part of the bowel slides into the next, like a telescope, causing blockage, swelling, and bleeding

**IV pentamidine**: a different antibiotic that can affect the kidneys

**Liver mets**: short for liver metastases, spread of cancer to the liver

**Meckel's diverticulum**: a small pouch in the wall of the intestine, present from birth

**Meconium**: baby's first poop!

**Med Ed, UWorld, Amboss**: popular test-prep resources for medical students

**MMI**: Multiple Mini Interview, the format conducted by Duke

**MSTP**: Medical Scientist Training Program, students who are pursuing dual MD and PhD degrees

**Nature**: a major research journal

**Ophtho**: short for Ophthalmology

# Glossary (2 of 2)

so that you, too, can feel comfortable using medical jargon in everyday life

**Oxidant-induced hemolytic reaction:** a devastating reaction involving the destruction of blood cells

**P=MD:** the refrain of students saying that passing = graduating medical school

**Palpate the liver:** a notoriously difficult physical exam maneuver

**Patagonia:** the brand of jackets often worn by medical students (often in gray or navy colors)

**Perfed the bowel:** accidentally putting a hole in the intestines, a complication of abdominal surgery

**Pimped:** word on the street is that it's short for "put in my place," i.e., being asked difficult questions while in clinic or on the wards (often in public)

**Post-call:** the day after a long (usually 12 or 24-hour) shift

**PSC:** primary sclerosing cholangitis, a disease of the bile ducts

**Rosalind:** reference to Rosalind Franklin, British Chemist whose work crucially contributed to the discovery of the DNA double helix

**Scope:** a camera sent into the GI tract

**Shelf:** standardized exams following each clerkship rotation

**Shooters:** the local dance saloon in Downtown Durham

**Sketchy Micro:** a popular test-prep resource using fun cartoons

**SOAP:** a medical note in the format of Subjective, Objective, Assessment, and Plan

**STEMI:** a type of heart attack

**Step 1:** the first medical board exam, often a large source of stress for students

**Step 2:** the second medical board exam

**Sub-I:** Sub-internship, an immersive clinical rotation for graduating students

**Tachycardic:** fast heartbeat

**Tenaculum:** a clamp tool used often in Gynecology

**USMLE:** United States Medical Licensing Exam

**Watson:** reference to one-half of the scientist duo credited with the discovery of DNA structure

# SFS Through the Years

The annual student-faculty show is an entirely student-run production that offers a comedic view of the experiences of a medical student at Duke, usually parodying a popular musical or movie. Proceeds of the show benefit a local Durham charity of the student body's choosing. Shows feature original songs and dances, student performances, and guest appearances by School of Medicine faculty. These shows also tend to have a theme surrounding student medical school experiences.

**1940:** from OPC to CPC

**1947:** It Could Happen to You

**1950:** Reflections

**1964:** Foxglove: A Musical Comedy

**1966:** Cram-A-Lot

**1967:** Noli Permittere Illigetimi Carborundum

**1968:** The Jim and Dave Show

**1969:** eMission Impossible: A Musical

Tragicomedy Morality Play in Two Acts

**1970:** Coginus, Ergo Sum: A Paregorical,  
Historical Allegory in Two Acts
